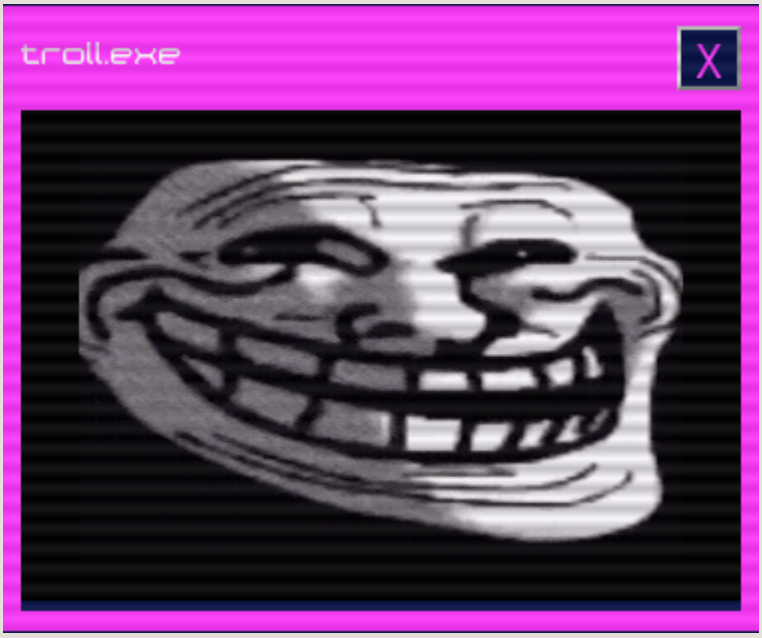
Troll.exe

Opening troll.exe will usually show the Trollface with a neutral expression as the Trololo song plays. After opening the file repeatedly, there is a chance that it will instead display a distorted

“Trollge”, the website will enter a corrupted state, and all other instances of the program will change to show the proper Trollface. A highly edited version of “Mango Phonk” plays.
The Trollge will stay on screen violently shaking and following your cursor around with its eyes.
Clicking on both of them removes the Trollgem and the site is reverted to normal.

After the site reverts to normal, opening the troll.exe will also display the normal trollface as well



We don’t know if it's related to April Fools in any way.

file-07-b-transcript.txt

Features the full transcript of the (Beta Mix) version of File 07. Nothing new to add, hopefully.

File 07 (Beta Mix) was uploaded the 1st of April, 2023.

smile.jpg

An image from the rip “Mail for the Mario Brothers (Demo Version) - Paper Mario: The Thousand-Year Door”
Smile.jpg grows in size when opened, you’re unable to close it. Just reload the site.
Letting it grow also does nothing, sadly.
Should be noted nothing of interest shows up when Silento or Silentó are typed in.

You can see Evil Brainless in it, who was featured in the 2024 April Fools event.

Using smile.jpg and Troll.exe at the same time doesn’t do anything special.

new funny comic that i found.png

True to its punchline, there's nothing happening with this entry. At least edit-wise the image is completely intact
The date of January 21 (written 1-21) could be a clue since that's when the comic was released

It has to be noted that this comic has been referenced some times on the channel, during the April Fools 2023 event particularly

There is a Reddit community called AlzheimersGroup which posts this over and over and uses similar titles to the file name, perhaps we are looking for a certain post/account?

playstation-flow-advertisement.png

Despite what one may think at first, both the “FULL POWER” and “ACTIVE” texts seen on the console are from the original picture

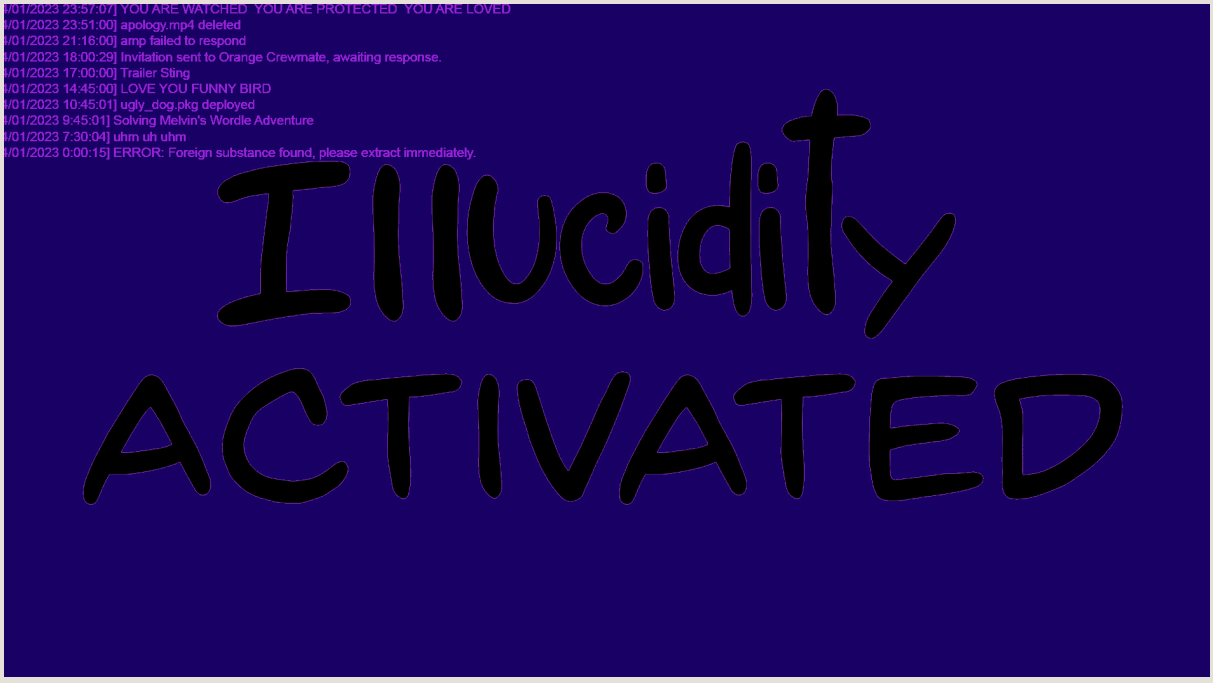
That image might be in reference to PlayStation Flow BIOS - Console/BIOS Music, uploaded on April Fools 2020.

Screenshot 2023-04-01 at 23.57.12.png

Could the date and time be important? Not important, the last video uploaded at that moment is referenced somewhere else

Folder contains following image:

If you change the brightness levels, it reveals the following text:



ILLUCIDITY TIMESTAMPS:

All of these timestamps correspond to upload times on April Fools Day 2023

ERROR: Foreign substance found: Hangar (Beta Mix) - Doom - Released 0:00:15

Umh uh uhm - of 2017 (Beta Mix)- Released 7:30:04

Solving Melvin's Wordle Adventure - Course Clear (Beta Mix) - Super Mario Maker - Released 9:45:01

Ugly_dog.pkg deployed - Mimiga Town (Beta Mix) (Beta Mix) - Cave Story: Released 10:45:01

LOVE YOU FUNNY BIRD - Environmental Noises (Beta Mix) - Super Smash Bros. Brawl- Released 14:45:00

Trailer Sting - Trailer Sting (Beta Mix) - Garten of Banban - Released 17:00:00

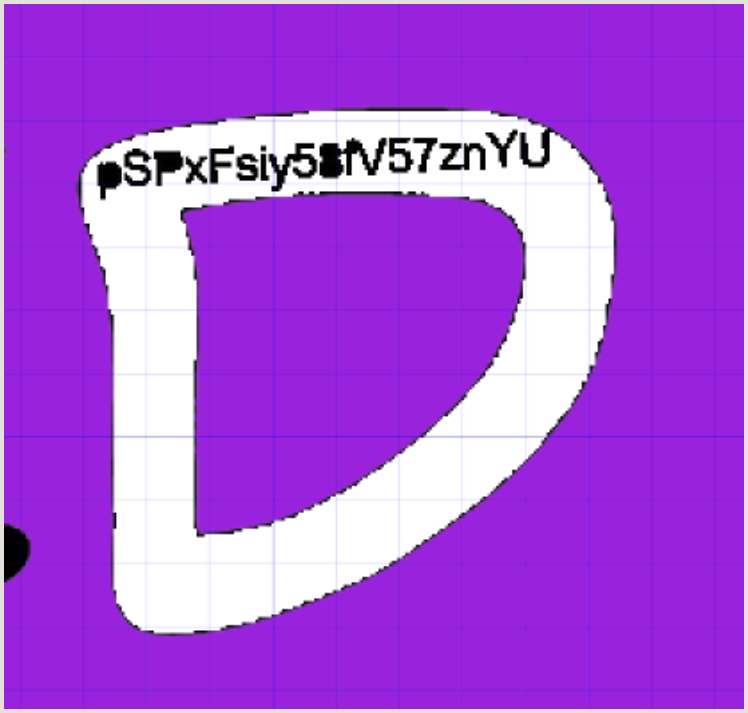
Invitation sent to Orange Crewmate, awaiting response: Narrow Road (Beta Mix) (Beta Mix) - Falsion - Released 18:00:29

amp failed to respond: Dr. Wily Stage 1 & 2 (Beta Mix) - GaMetal - Released 21:16:00

apology.mp4 deleted: Apology. (Beta Mix) - Released 23:51:00

YOU ARE WATCHED YOU ARE PROTECTED YOU ARE LOVED - Seasonal Return [Episode 1] (Beta Mix) - The SilvaGunner Christmas Comeback Crisis - Released 23:57:07

There is also some hidden text in the D of ACTIVATED:



pSPxFsiy58fV57znYU

Inputting this into a Vignere cipher with the key “Revel” (Gotten from the Melvin’s Wordle Adventure video, indicated by the brightness-changed image in the top left) gives us yOUtUbed58bK57ijDQ, which reformatted, leads to:

https://www.youtube.com/watch?v=58bK57ijDQ

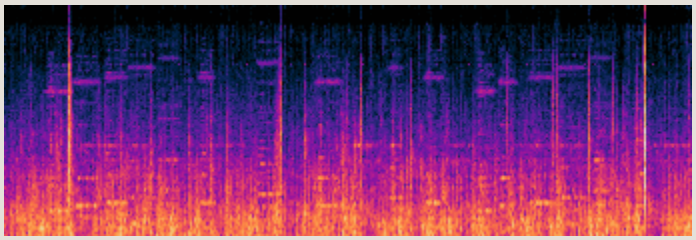
40 minutes of Minecraft footage.

There is a LOT inside this 40 minute video, please fill it out below:

Minecraft with Gadget

You can shut up now. He’s always on duty.

The Inspector Gadget theme constantly loops throughout the video itself; however, this is only apparent when the video is viewed under a spectrogram:

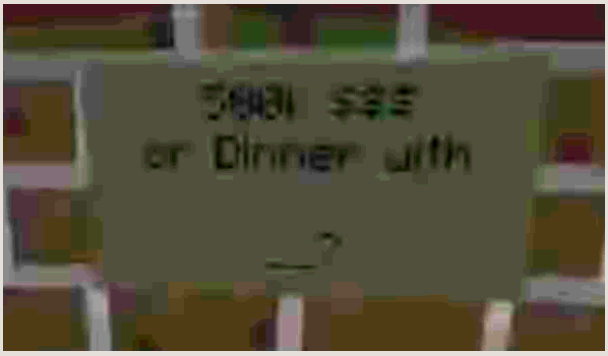


The video also seems to include multiple pairs of two letters, with a “template” at the end in which, we assume, we’re supposed to place said letters.

Notable video details:

3:02, two signs, left saying “ig” (inspector gadget?) and right saying “I’m having a lot of fun”

10:11 Says: “500k $$$ or Dinner with __?”



(answer is likely “jz”)

16:40, it says gullible on the ceiling. (The sign in the distance says “CYBERNETIC BRAIN”)

funny

[17:53](#) “__?” “Buildings bricks with Minecrap”

UPDATE:
We got a hint!

This is a quote from the KFAD Mojo:

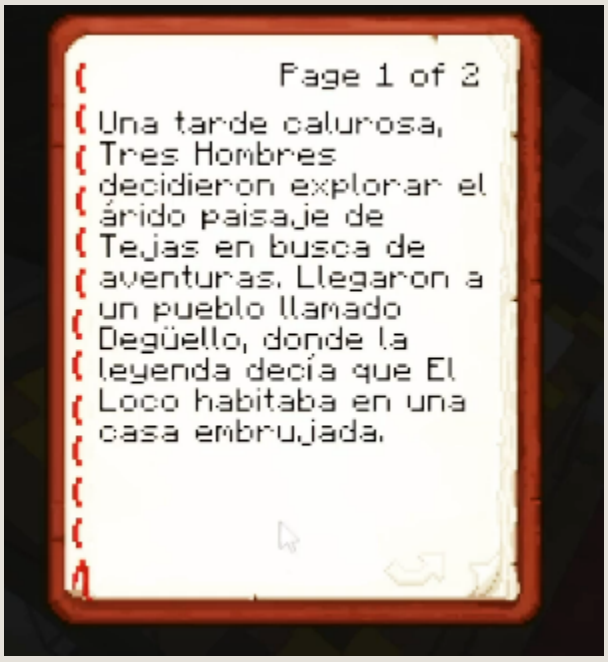
> We did a collab! I know I maybe don't show it but I'm a hard Animal Crossing addict. New Leaf is my main jam now. My village? Fly as hell. And the music - man shoutout to my pup K.K. Slider. That dog really knows how to lay down a track. I've been wanting to cover one of his songs forever. And I knew it would be just plain poppycock if I didn't get someone from over there to help me out with it, so I reached out to Isabelle to do a feature.

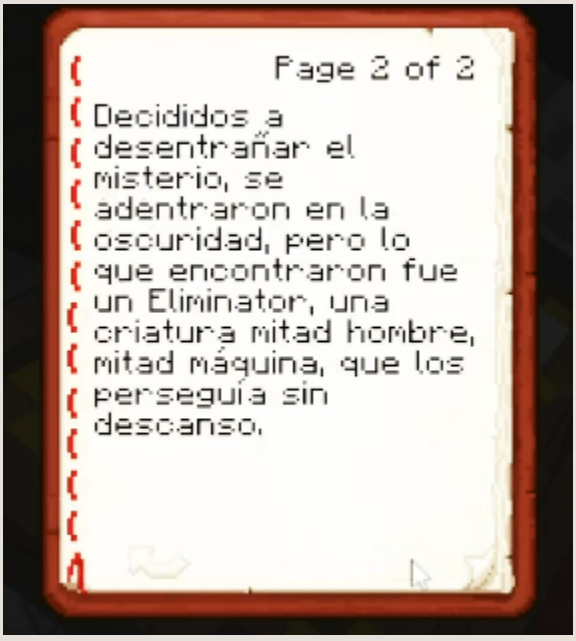
Keeping this in mind, taking a closer room that contains this sign:

Shows that this the same colors as K.K. Soul.

Therefore, __? Is probably KK.

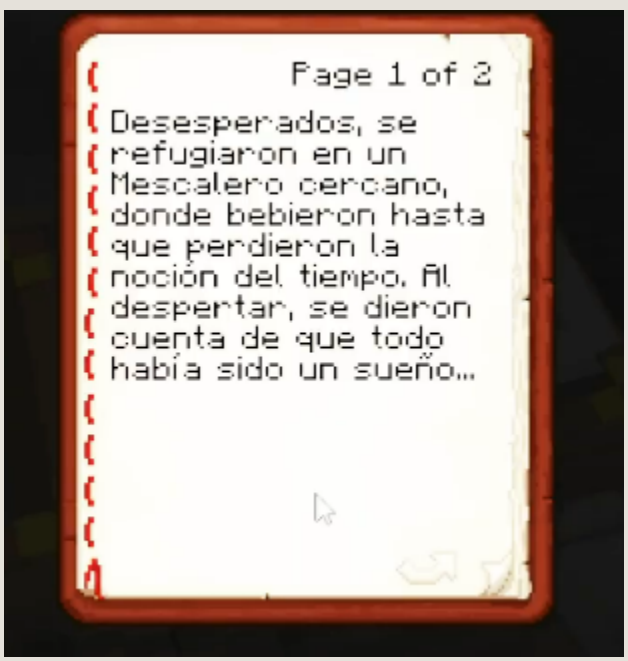
Two books with two pages at around 23 minutes:

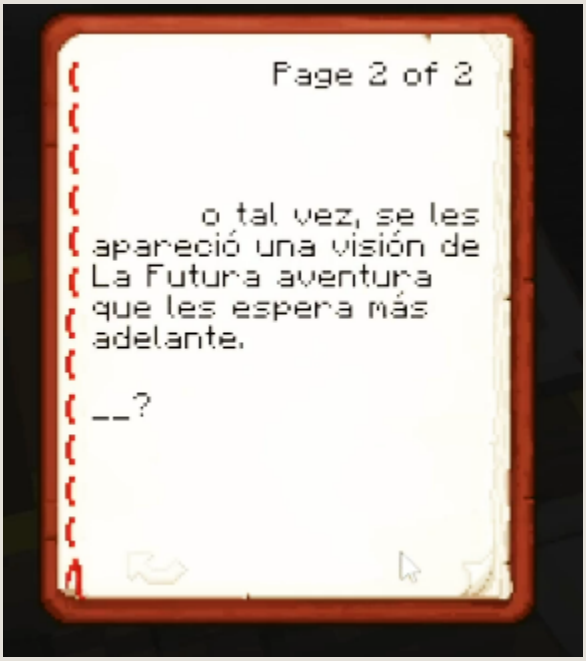




"During a hot afternoon, three men decided to explore arid Texas in search of adventure. They reached a town called Deguello, where legend says El loco (the crazy man) lived in a haunted house."
"Intending to solve the mystery, they entered the darkness, but what they found was an Eliminator, a creature half man, half machine, who chased them with no rest"

- SmallBlue (ping me for spanish translation work lmao)





“Desperately, they hid in a nearby Mescalero (tribe?)(idk what that is) (a kind of Distillery), wherein they drank until they lost track of time. When they woke up, they realized that everything that happened had been a dream.

“ Or, maybe, they saw a vision of The Future adventure that awaited them later in time.

__?”

- SmallBlue again

The capitalized words match with albums from the band ZZ Top

Discography [edit]

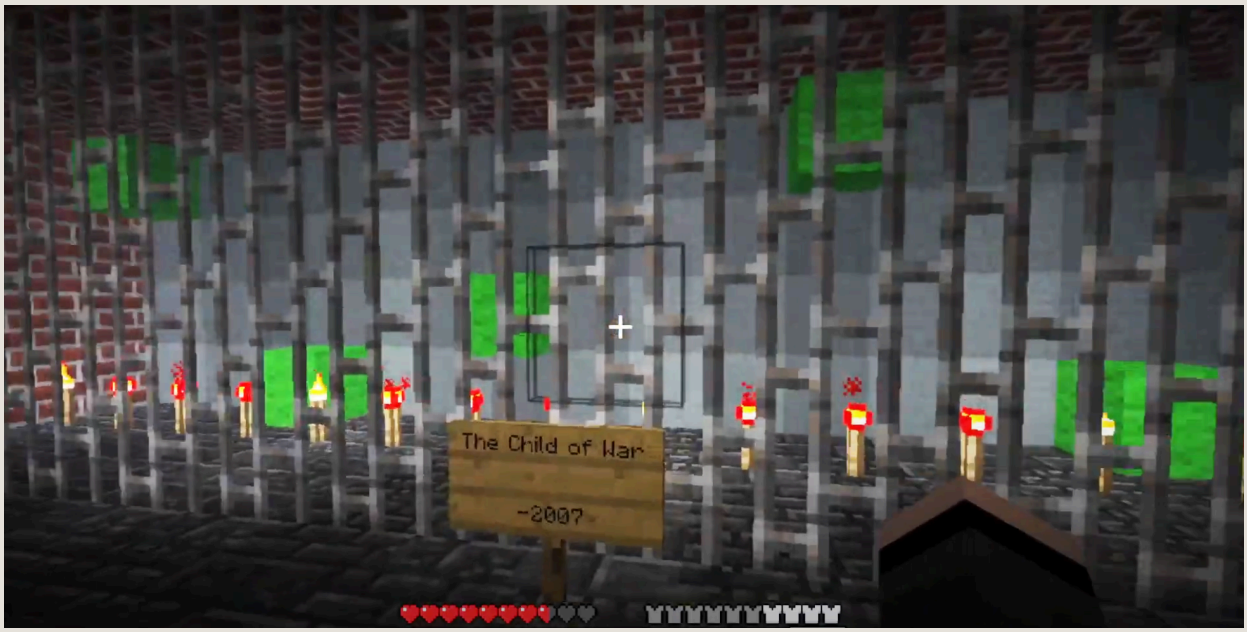
Main article: ZZ Top discography

Studio albums

- *ZZ Top's First Album* (1971)
- *Rio Grande Mud* (1972)
- *Tres Hombres* (1973)
- *Fandango!* (1975)
- *Tejas* (1976)
- *Degüello* (1979)
- *El Loco* (1981)
- *Eliminator* (1983)
- *Afterburner* (1985)
- *Recycler* (1990)
- *Antenna* (1994)
- *Rhythmeen* (1996)
- *XXX* (1999)
- *Mescalero* (2003)
- *La Futura* (2012)

So the __? At the end is probably ZZ.

33:36 SouljaMan room

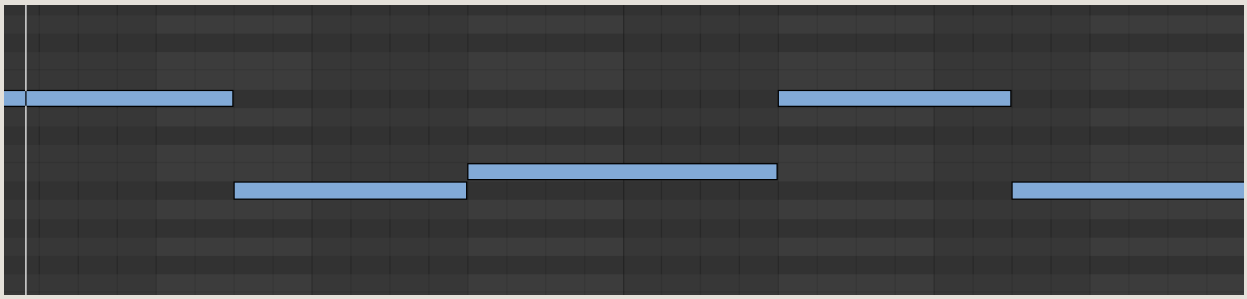


The green wool blocks represent the steelplan loop in Crank That by Soulja Boy, which was also released in 2007, and the ‘Child of War’ can be linked to him:

Child of War = Soldier boy

Soldier boy = Soulja Boy

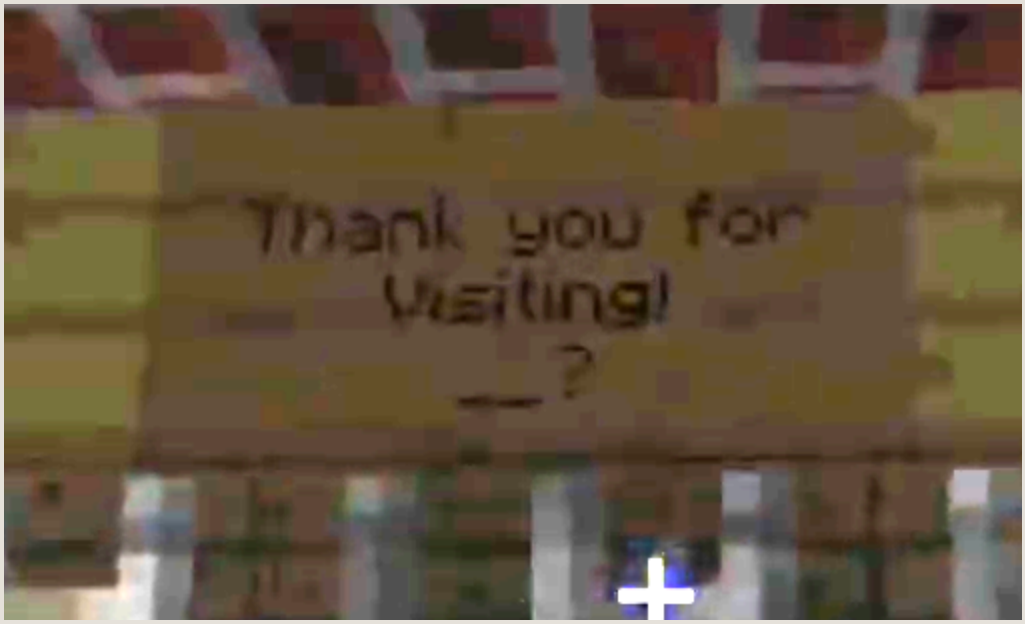
(Here’s the loop)

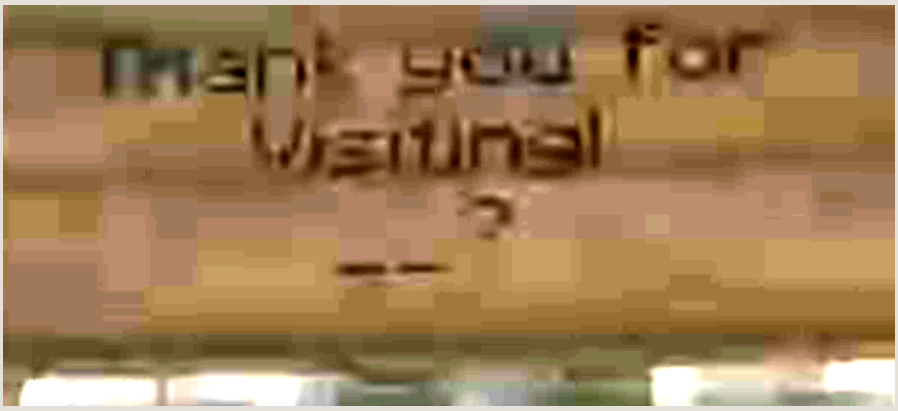


In the same room exists this picture:

1938 was the year that Action Comics #1 was released; the first comic to depict Superman as a character.

This is referencing the famous Crank that line “Superman That Ho”.





“Thank you for Visiting!” “__?”

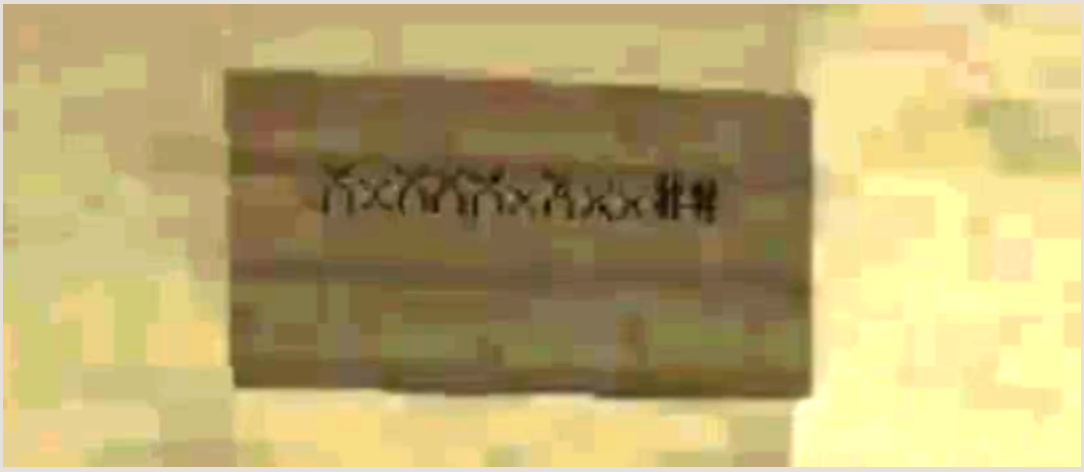
The __? In this room is probably HO (Superman That HO)

36:45 chest with music disc, player plays in jukebox.

C418 - 400 would be C18.
Because we take away the 400.

39:22

XxXXXxXxx##



We likely have to fill this up with letter/number pairs found throughout the video to make a YT link
X = Uppercase
x = Lowercase
# = numbers

Based on the music note carpet layout, the blanks most likely should correspond with musical artists.

In total, there are 5 Uppercase letters, 4 Lowercase letters and 2 numbers that need to be found-*/

10:11 Sign: 500k $$$ or Dinner with __?
JZ (from Dinner with *Jay-Z*)

17:53 Sign: KK
__? Building Bricks with Minecrap
The building bricks room seconds before this sign had the KK Soul colors.

23:54 Books: Zz
Long text with capitalized words that correlate with ZZ Top albums and ends with "__?"

33:36 Sign: Ho
Thank you for Visiting! __?
relating to the soulja boy lyric and superman

36:45 Music disc: c18
Hovers over a music disc labeled C418 - 400.
c418 is the musician behind Minecraft Volume Alpha, but "400" is not a real track, so instead it can be interpreted as a math equation.
c418 - 400 = c18. "8" is a valid final character as noted above.

Combining Jz, KK, Zz, Ho, and c18 together, we get the Youtube Video ID for our next step.
hurt.ogg - Minecraft 2.0
https://www.youtube.com/watch?v=JzKKZzHoc18

At 1:48, the following link can be seen:

https://imgur.com/D5xlSei leads to the following image:

LOGAN PAUL vs STEVE JOBS

The image then has a video ID at the bottom which leads to

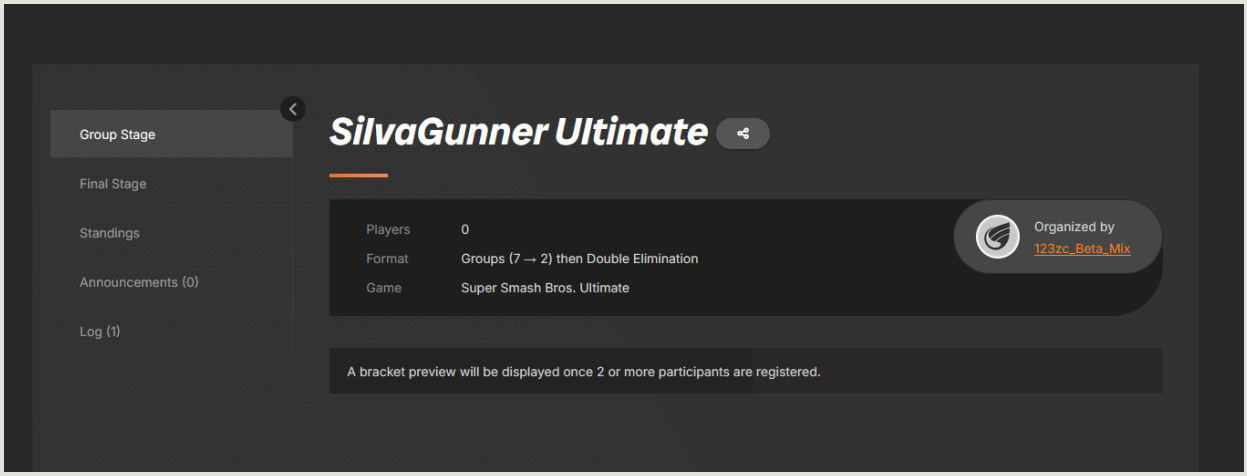
SilvaGunner Smash Ultimate Tournament Top 6 (Beta Mix) - Part 1

https://youtu.be/5rsOf_XwkSY

The video appears to be a competitive Smash Bros match commentated by Mike and James Rolfe, who talks an awful lot like Inspector Gadget.

in the smash video the captions talk about hotel whiskey at 2:45, hotel and whiskey are NATO Phonetic Alphabet for H and W

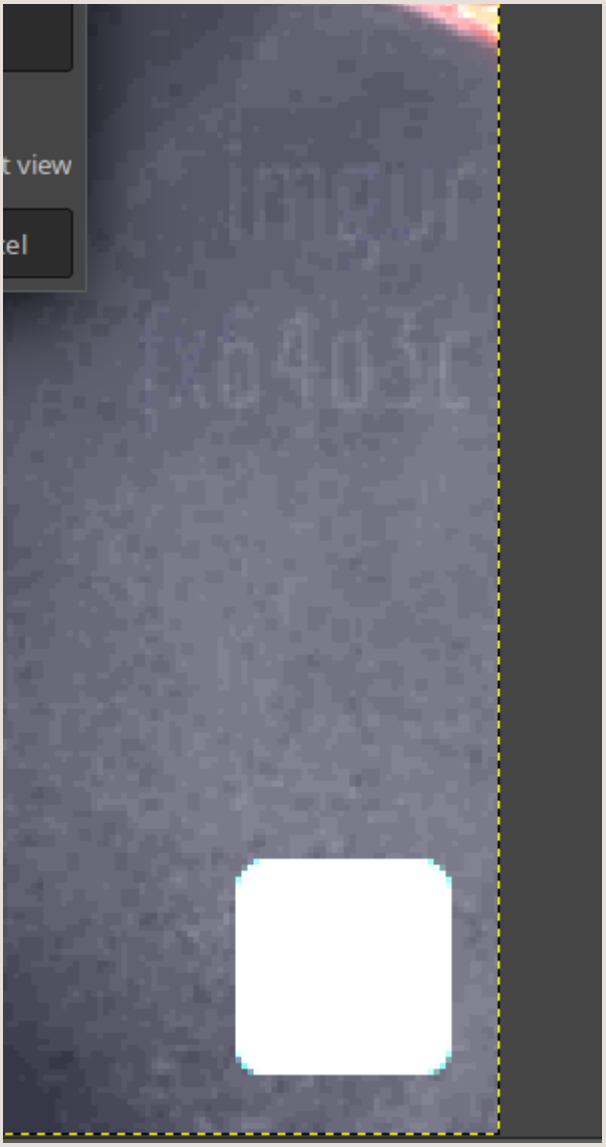
Included in the video description is a challonge link,
https://challonge.com/SilvaUltimate/



The user who made this challonge is named
https://challonge.com/users/123zc_beta_mix

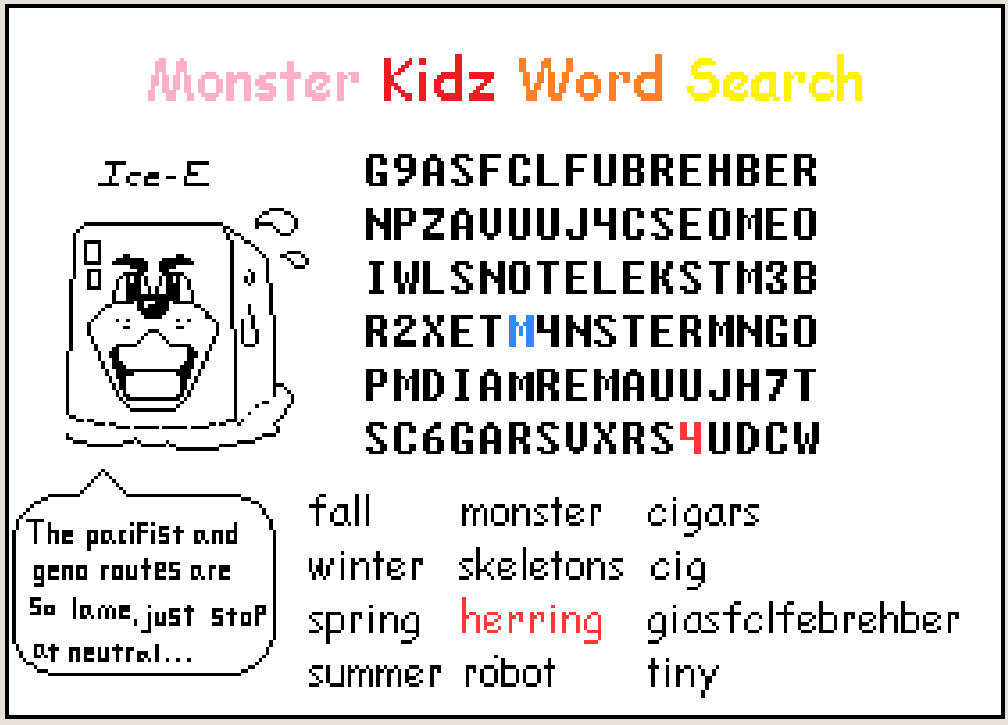
123zc is a known figure, being the siivagunner explained guy. Beta mix probably points toward some rip involving them with that as a postfix?
https://www.youtube.com/watch?v=5VlbREl_d5M
This is a Beta Mix rip from April Fools 2023 that was ripped by 123zc (notably after they left SilvaGunner)
MaxPH had a secret in a bonus image released for a specific album, could the same happen here?

The Logan Paul vs Steve Jobs image, when brightened up, also points to an imgur in the bottom right



The imgur link leads to
https://imgur.com/word-search-fx64o3c

Word Search



The original word search as reference

WORDSEARCH DIFFERENCES
FIRST LINE

Second character, I, replaced by 9.
SECOND LINE
Third character, B, replaced by Z. Ninth character, J, replaced by 4.
THIRD LINE
Fourteenth character, F, replaced by 3.
FOURTH LINE
Second character, L, replaced by 2. Sixth character, M, made blue. Seventh character, O, replaced with 4.
FIFTH LINE
Fourteenth character, I, replaced with 7.
SIXTH LINE
Third character, I, replaced by 6. Twelfth character, O, replaced by a red 4.

Mermaid is replaced by herring in the list of words and colored red lol. Hot has been replaced by Tiny (possibly means TinyUrl?).

The word search also advises to “just stop at neutral,” which may hold meaning in the context of Smash.

Below is some speculation on how to connect the Smash video and the word search:

Attempt 1:
(See attempt 2 for explanation)
CLOUD'S STRING, STARTING AT 4: 4UUAMERMAIDX (Apparently, it’s actually 4UUAMERMAIDM)
The red herring replaces “mermaid” in the original search, string without mermaid: 4UUAX (possibly 4UUAM)
FALCON’S STRING, STARTING AT M: MMR
FALCON’S STRING, INCLUDING DROPPING THROUGH PLATFORM, STARTING AT M: MMRS

Attempt 2:
Looking at the Smash video, tracking each character's directional inputs (specifically only aerials, tilts, smashes, and taunts) until their first taunt and *applying those directions to the word search* from the red/blue starting points (same colors as P1 (cloud)/P2 (falcon)) leads to the following strings:
(dashes indicate neutral attacks, which may or may not be needed;
falcon’s inputs require looping around the crossword’s sides as well)
Using the SilvaGunner Wordsearch :
Cloud: 4UUAMERMAIDM2-XETM4-T-ONS-AZ-LXE-IDMP-R

Falcon: MMR-4NST-AUUJH7-C-DU4U-JMTM3BI-ROTW-R (Evidently incorrect since the Falcon link is different, needs double-checking)

Using the original UNDERTALE wordsearch:
Cloud: OUUAMERMAIDML-XETMO-T-ONS-AB-LXE-IDMP-R
Falcon: MMR-ONST-AUUJHI-C-DUOU-JMTMFBI-ROTW-R

The strings (arbitrarily) end on the first time each character taunts, which soon begins the fight; this is because it could be seen as the end of "neutral."

Alternatively, if you just take the starting character and the letters on neutral inputs:
These strings both provide TinyURL links.
Cloud: 424TSZEP
Falcon: mrt7cs3d

Putting Cloud's letters at the end of a TinyURL link works (tinyurl.com/424TSZEP) and goes to this image:
BPGT.png
Changing the extension to a .rar works, and it contains a midi file:
"BPGbutFCSmidi.mid"
Holy shit. HOLY SHIT

Falcon's letters go to another TinyURL link (tinyurl.com/mrt7cs3d) that, when also downloaded and converted to .rar, provides "The_Ultimate_Buddy_Holly_Soundfont.sf2" (they need to be put together probably)

Etc. Info:
Inputs used to source the movements:
(may not be 100% accurate; also unsure whether to use left/right or forward/back inputs to determine movement direction. falcon's "turn" and "step" inputs are likely unnecessary)
Cloud:
uptilt, 10x L-bair, upsmash, **neutralb**
R-fsmash, R-ftilt, 2x R-fair, R-fsmash, **nair**
upair, **neutralb**
3x L-bair, **nair**
upsmash, L-bair, **nair**
dsmash, dtilt, R-ftilt, **nair**
dair, 3x L-bair, **neutralb**
jab
uptaunt

Falcon:
dtilt, R-bair, **neutralb**
upsmash, 5x R-bair*,* **nair**
dsmash, 5x R-bair, **neutralb**
dair, **nair**
L-ftilt, L-fsmash, L-ftilt, *turns right*, R-fair, **neutralb**
2x uptilt, *turns left,* upair, *2x left steps,* 4x R-bair, **nair**
dsmash, L-fair, dair, dtilt, **nair**
dtaunt

We should keep in mind the “fx64o3c” in the filename, maybe (Note that this is random text imgur auto-adds to all of its image links. It is probably nothing.)

Alternatively: this could be a red herring.
I mean herring is in red.
(Not unlikely, but possible. What I mean to say is, no one knows for sure until we find out.)
x

ITS A FOOLISH COURT OVER THERE
Its me noobo(im just glad we didnt get executed)
